Molecular Virology

(B-303)

(New)

Time: Three Hours)

[Maximum Marks: 75

Section A

Note: All questions are compulsory. Each question carries 3 marks. Short answer is required not exceeding 75 words.

 $3 \times 5 = 15$

- Virion
- ELISA
- Application of PCR
- 4.
- 5. Structure of any ssRNA virus.

P.T.O.

Section-B

Note: Attempt any two questions. Each question carries 71/2 marks. Short answer is required not exceeding 200 words.

 $7\frac{1}{2} \times 2 = 15$

- Give a brief account of classification of animal virus.
- Genome organisation of any plant virus and its replication.
- Economic losses due to important plant viruses.

Section-C

Note: Attempt-any three questions. Each question carries 15 marks. Details answer is required. $3 \times 15 = 45$

Give an account of important viral diseases in animals including type of disease, host, target tissue and mechanism of infection.

HIV

https://www.ccsustudy.com

- Mention the structure and mechanism of "Hepatitis B" in detail.
- Explain with the help of suitable diagram the serological methods i.e., direct, indirect and sandwitch elisa used for quantification of viruses.
- Discuss the suppressors of RNA silencing encoded by plant viruses and their role in viral infection.
- 13 Write notes on : 1
 - (a) Herpes virus
 - (b) Role of electron microscopy in diagnosis of viral infections
